

DEBORAH STOLERU

CAREER GOALS

Seeking an opportunity with an innovative company that needs a productive and energetic designer to make a difference in the industry.

Passionate, dynamic and creative beginner UX designer who is looking for the possibility to professionally create engaging, responsive and user-friendly content.

WORK EXPERIENCE

AUPAIR WORLD, COLOGNE (DE) | OCTOBER 2019-MARCH 2020 | AUPAIR

The reasons that led me to become an AuPair were: to improve the language skills, gain more experience in childcare and learn more about the German culture.

Together with the family, we were able to organize the weekly responsibilities-activities, in order to cooperate and take care of the 3 children properly (9, 4, 1.5 years old).

ITAS TRENTIN, LONIGO (IT) | SEPTEMBER 2016-MAY 2019 | INTERN

The Trentin institute prepares chemical experts with good basic knowledge. The skills I have acquired were: growing bacterial colonies in Petri dishes; working in a team; applying the scientific approach to problems and presenting the results of projects in front of an audience of 25 people.

VETERINARY, LONIGO (IT) | SEPTEMBER 2018 | INTERN

Part of the internship consisted of assisting veterinarians in the exam room and with daily tasks, like the maintenance of an organized work-space. Another given opportunity as an intern was to observe surgery preparation techniques and general medical procedures.

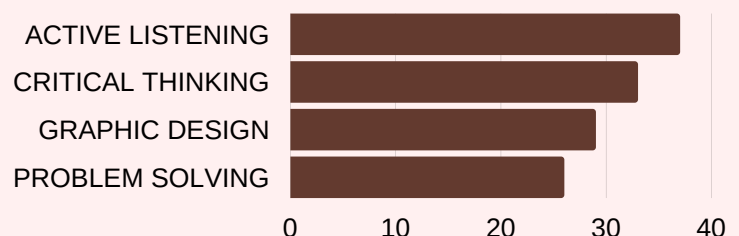

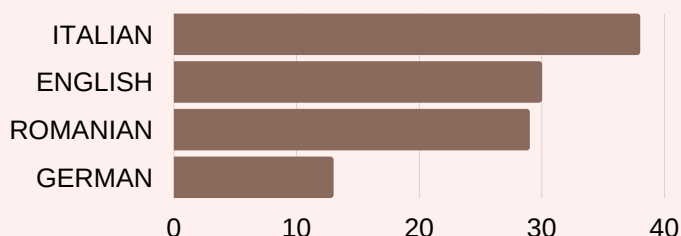

OPTICS CAINELLI, LONIGO (IT) | JUNE 2018 | INTERN

I have learned how to approach and interact with customers and the importance of listening to their requirements in order to meet their needs and give them a satisfying customer experience.

HOSPITAL, LONIGO (IT) | JUNE 2017 | INTERN

Thanks to this opportunity I was able to observe how doctors and nurses work together to guarantee the best treatment to their patients, and how everybody's role is essential in a hospital facility.

SKILLSET

EDUCATION

- October 2020 GOING-TO INTERNET | YOUTUBE
 - how to build your own website

Music

PERSONAL PROFILE

The science of Art has fascinated me since I was a child, when one of my favorite hobbies was to recreate the characters from the Disney movies.

I have always been wondering if there is the concrete possibility to find a job where creativity is one of the first requirements, so after finishing High School I took some time to document more and find out what professional career to pursue.

Nowadays there are so many jobs that require artistic talent and a creative mindset, this is the reason that motivated me to take some HTML+CSS classes on Skillshare.

Currently seeking the possibility to learn more about UX design and to constantly update my knowledge in order to keep up with the latest trends.
